# VIDYAPEETH

**BATCH CODE: 12-AN181MA-2026**

**SUBJECT NAME:** Zoology

**CHAPTER NAME:**

Structural organisation in Animal.

**Lecture No.** 02

**By- Murshid Zafar Sir**

# Today's Goal

**Subtopic** .. Amoeba

**Subtopic** ..

**Subtopic** ..

Cell → Amoeba

↓

Tissue

↓

Organ

↓

O. System

↓

Organism

Complexity ↑es

Total

Potential

Totipotent

Stem cell

Bank

# Tissue

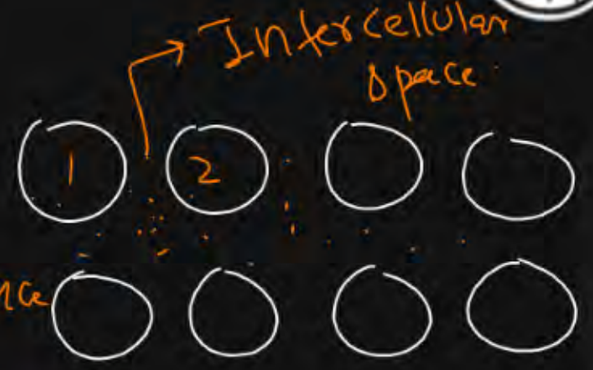
→ Tissue are the group of Similar cell

+

With intercellular Space (have Intercellular Substance

+

Perform Specific function



Note :- Intercellular Substance | Matrix | Ground Substance (एक cell से दूसरी cell से जोड़ता है).

All the complex animal are made up of all four type of Tissue.

(I) Epithelial Tissue

(II) Connective "

(III) Muscular " →

(IV) Neural | Nervous "

Note:- इस Chapter में Epithelial & C. Tissue की detail में पढ़ना है।

# Origin of Tissue

Sperm + Ovum → Zygote → Morula → Blastula → Gastula

Sperm ⇓ n = 23 ©

Ovum n = 23 ©

Zygote: 2n = 46 © ↓ Single cell

Morula

Blastula

Gastula (★★★)

Outermost layer = ECTODERM

Middle layer = MESODERME

Inner layer = ENDODERM

⇓ Known as Germ layer

## Basic Basic

Germ cell | Sex cell | Gamete → Sperm, Ovum

## Reproduction

- Asexual → Fusion of gamete not occur.
- Sexual → Fusion of gamete occurs

## Cell division

① Mitosis → Photocopy wala division

2n = 46 → 2n = 46 c, 2n = 46 c

Meiosis: 2n = 46 c → n = 23 ©

# Origin of Tissue → Pyq

| | Types of Tissue | Origin |
|---|---|---|
| (I) | Epithelial | ECTODERM, MESODERM & Endoderm |
| (II) | Connective | MESODERM |
| (III) | Muscular | MESODERM |
| (IV) | Nervous | ECTODERM |

# Function of Tissue → Pyq

| | Types of Tissue | Function |
|---|---|---|
| (I) | Epithelial | Covering & lining |
| (II) | Connective | → Connect \ linking<br>→ provide support to the body<br>→ Transportation nutrient & gases |
| (III) | Muscular | Contraction & relaxation which lead to Locomotion & Movement |
| (IV) | Nervous | Control & co-ordination |

Basic Book

**Connective Tissue**

- Connect / linking
  - Ligament (connect bone to bone) — BABLI
  - Tendon = Connect bone to muscle
- provide support to the body
  - Bone
  - Cartilage
- Transportation of Nutrient & gases
  - Blood
  - Lymph

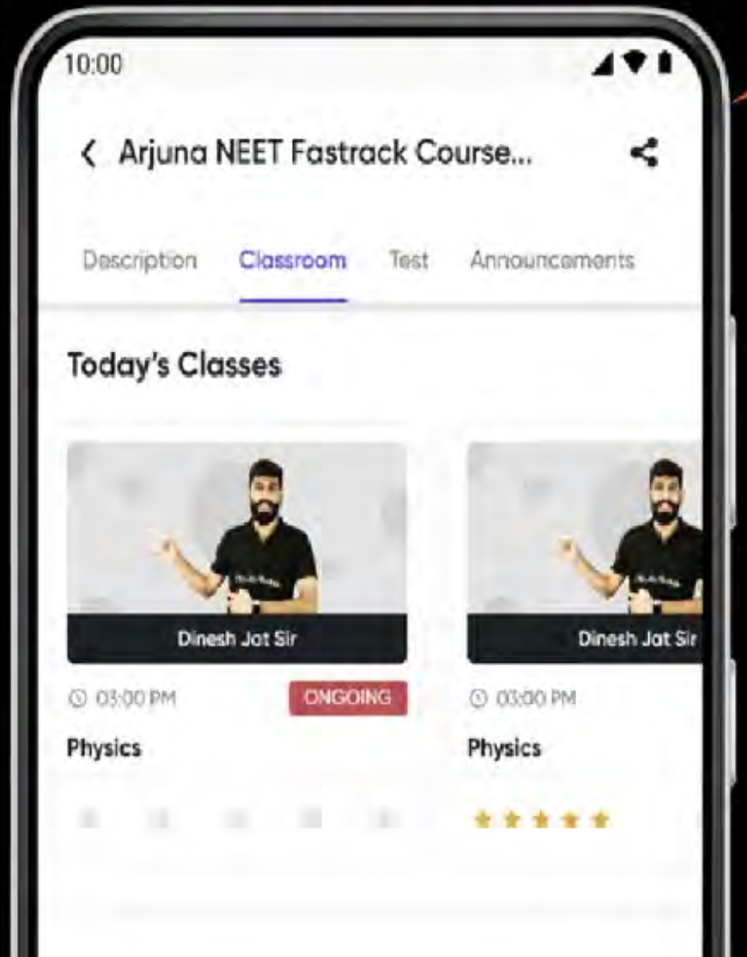
**Rate your today's class in the Batch**

**Solve the DPP and check Solution**



**DPP-2**

SCAN ME FOR VIDEO SOLUTIONS

1. A ball of mass 100 gram is moving with a velocity of 15 m/s. Calculate the momentum associated with the ball
   (1) 1.5 kg m/s (2) 3 kg m/s
   (3) 0.5 kg m/s (4) 1 kg m/s
2. A body of mass 40g is moving with a constant velocity of 2 cm/s on a horizontal frictionless table. The force on the body (in dynes) is
   (1) Zero (2) 39200
   (3) 160 (4) 80

# Thank You!!!!
