VIDYAPEETH

BATCH CODE : 12- AN-181MA

Subject Name – Zoology

Chapter Name – Structural Organization in Animals

Lecture No.- 08

By- Murshid Zafar Sir

Today's Goal

Subtopic → Connective tissue.

Subtopic →

Subtopic →

Basic Basic

Blast: formation

Clast = Destroy

Cyte = cell.

Macro = big

Phage = to engulf

Osteo = Bone

Chondro = cartilage.

Hepatic = Liver

Renal = Kidney.

inflammation = Swollen + pain

Cell of C. Tissue

(I) Fibroblast

→ Largest cell of C.T

→ Most abundant

→ Fibroblast is responsible for production of fibre & Matrix

Fibroblast.

(II). Macrophage

→ It engulf dead cell so Known as Scavenger cell.

→ It also engulf Microbe.

→ Shape of Nucleus = Kidney shape

→ 2nd largest cell.

→ Macrophage is phagocytic in nature bcz it engulf dead cell.

Phagocytic cell
- → Macrophage
- → Monocyte
- → Neutrophill

= is a type of WBC.

Macrophage

iii) MAST CELL (U·V·I).

→ 3rd largest cell of C.T.

Mast cell secrete Three chemical

(i) Histamine

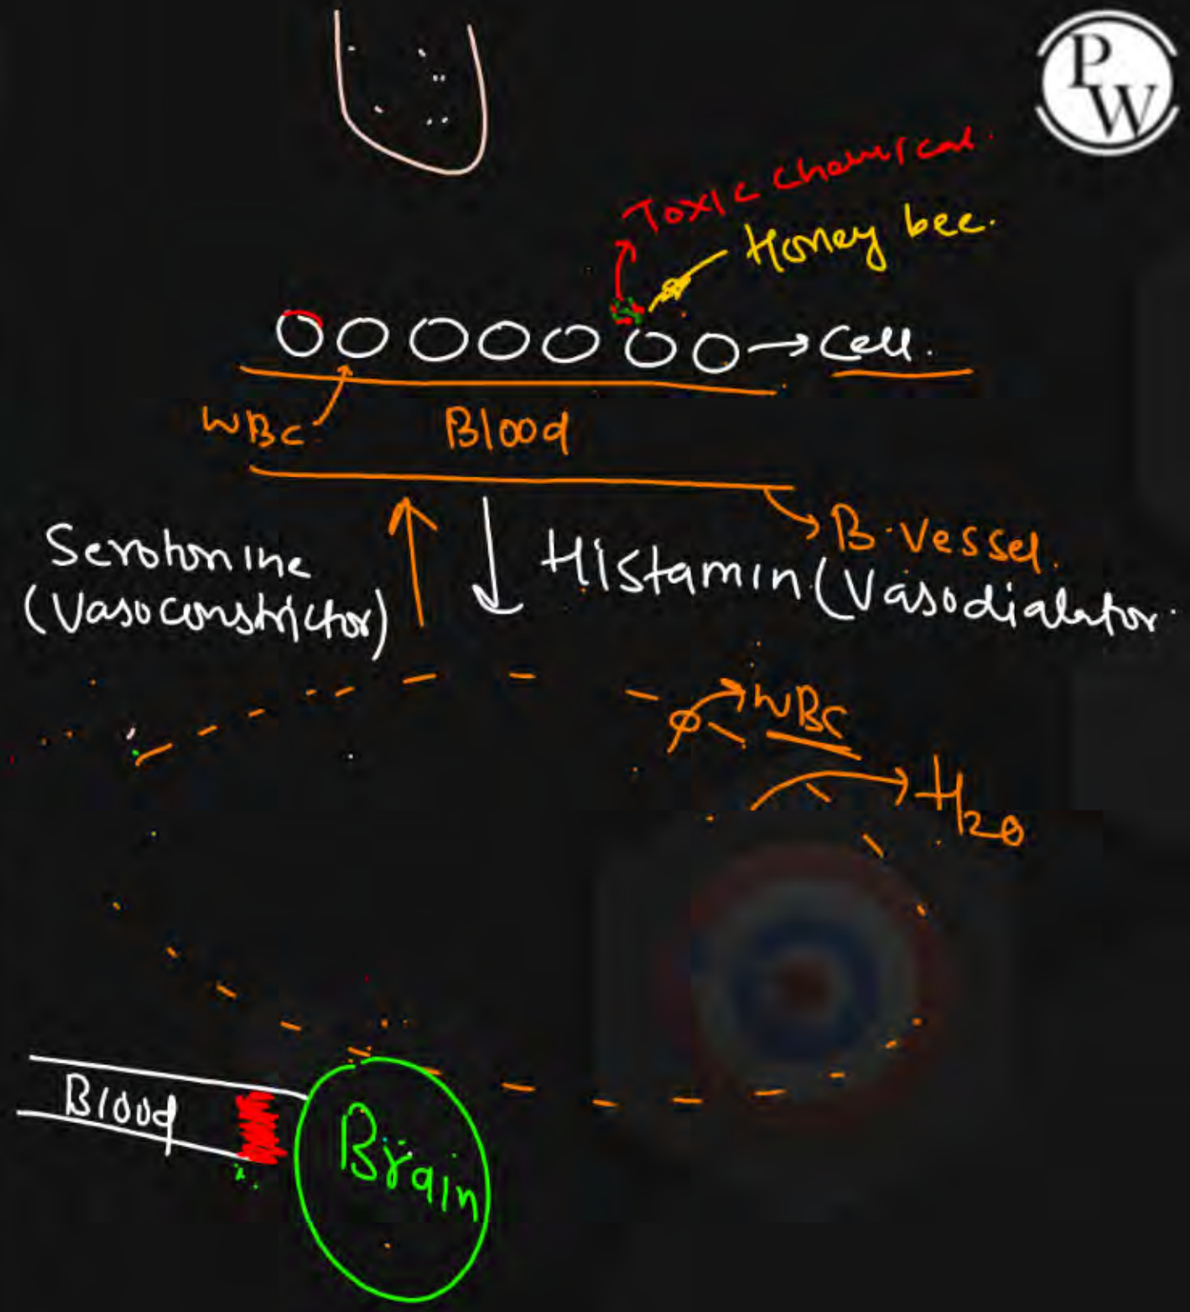
→ It ↑es the diameter of Blood Vessel So, known as Vasodialator

(ii) Serotonin

→ It ↓ the diameter of B. Vessel so, known as. Vasoconstrictor.

(iii) Heparine.

→ is natural anticoagulant



IV) Lymphocyte

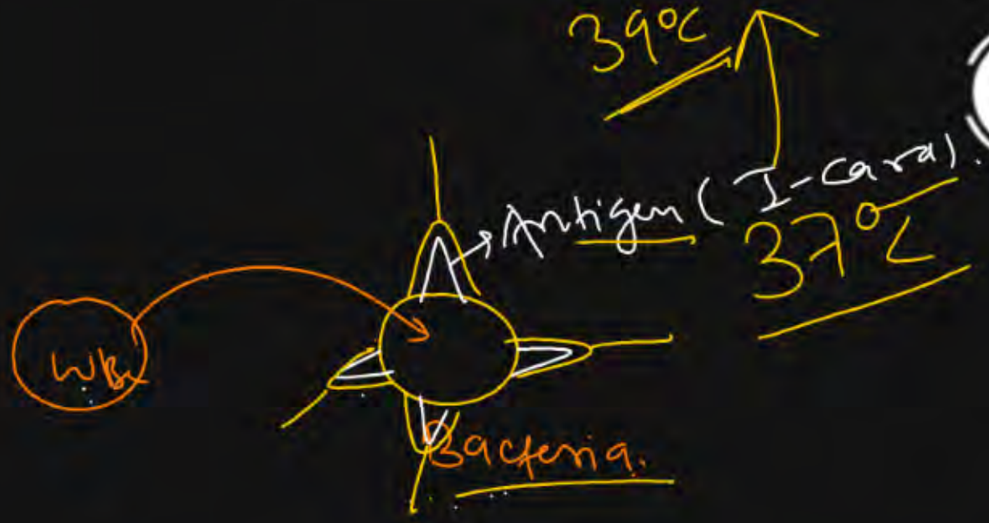
→ is a type of WBC
→ have large & round nucleus

Lymphocyte

↓ divide

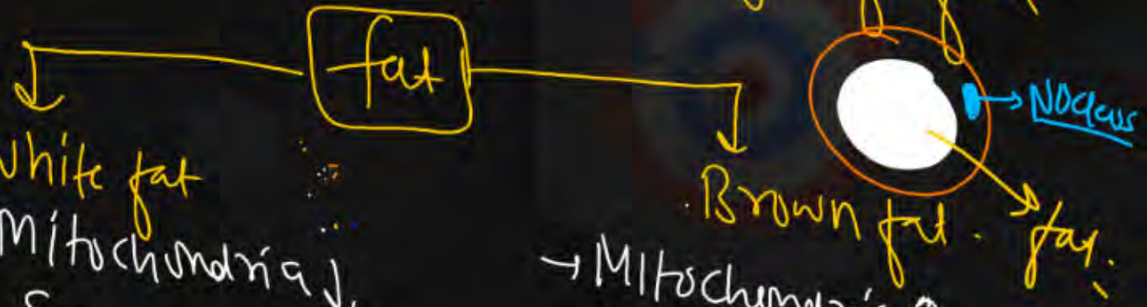
V) Plasma cell

→ is a type of WBC.
→ Cartwheel shape nucleus
→ Responsible for production of **Antibody**



(VI) Adipocyte = गोंद fat है।

→ Adiposite is for storage of fat.



White fat
→ Mitochondria ↓
→ Energy ↓

Brown fat
→ Mitochondria ↑.
→ Energy ↑.

Fibre

→ Fibre are made up of protein so, known as protein fibre.

PYQ → Fibre provide strength, flexibility & elasticity to the connective tissue.

→ There three type of fibre.

(I) Collagen fibre | white fibre

→ Most abundant fibre

→ Strongest fibre.

→ Made up of Collagen protein

(II) Elastic fibre | Yellow fibre

→ Elastic in nature

→ Made up of Elastin protein

→ provide elasticity & flexibility to the C. Tissue

(III) Reticular fibre

→ Weakest fibre.

Topic : Connective Tissue

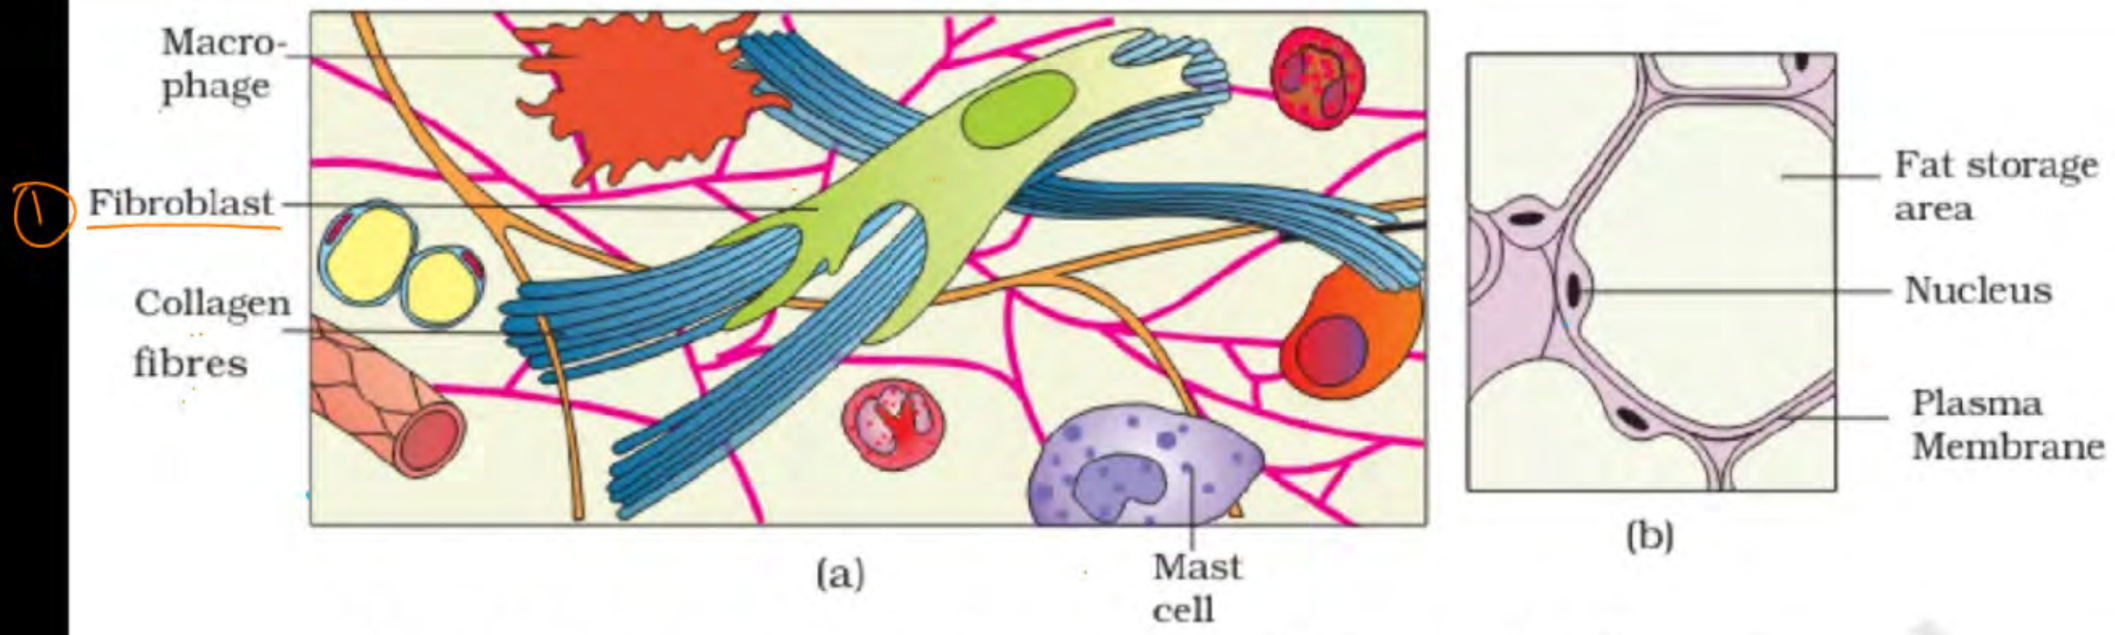


Figure 7.4 Loose connective tissue : (a) Areolar tissue (b) Adipose tissue

Every Student . Every Day .

Good Attendance Means..

95% to 100% Attendance.

RFID Card Punching

Best Chance of Success in

" JEE / NEET Exam "

WORK, POWER AND ENERGY

DPP-1 (JAP/046)

[Introduction, Definition of work, work done by constant force, Area under force-displacement curve]

1. A particle moves from position $\vec{r}_1 = 3\hat{i} + 2\hat{j} - 6\hat{k}$ to position $\vec{r}_2 = 14\hat{i} + 13\hat{j} + 9\hat{k}$ under the action of force $4\hat{i} + \hat{j} + 3\hat{k}$ N. The work done by this force will be
(A) 100 J
(B) 50 J

(A) 8×10^{-2} joules
(B) 16×10^{-2} joules

Thank You!!!!
